

## Conservative Fund

**Fund update for the quarter ended 30 September 2025**

This fund update was first made publicly available on 29 October 2025

### What is the purpose of this update

This document tells you how the Conservative Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Smartshares Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

### Description of this fund

Aims to protect capital and provide a moderate return over the medium term (at least 3 years). The fund invests mostly in income assets, with a modest allocation to growth assets

Total value of the fund	\$895,094
Number of investors in the fund	17
Date the fund started	24 November 2020

### What are the risks of investing?

**Risk indicator for the Conservative Fund<sup>1</sup>**

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund’s assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [sorted.org.nz/tools/investor-profiler](https://sorted.org.nz/tools/investor-profiler).

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund’s future performance. The risk indicator is based on the returns data for 5 years to 30 September 2025. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

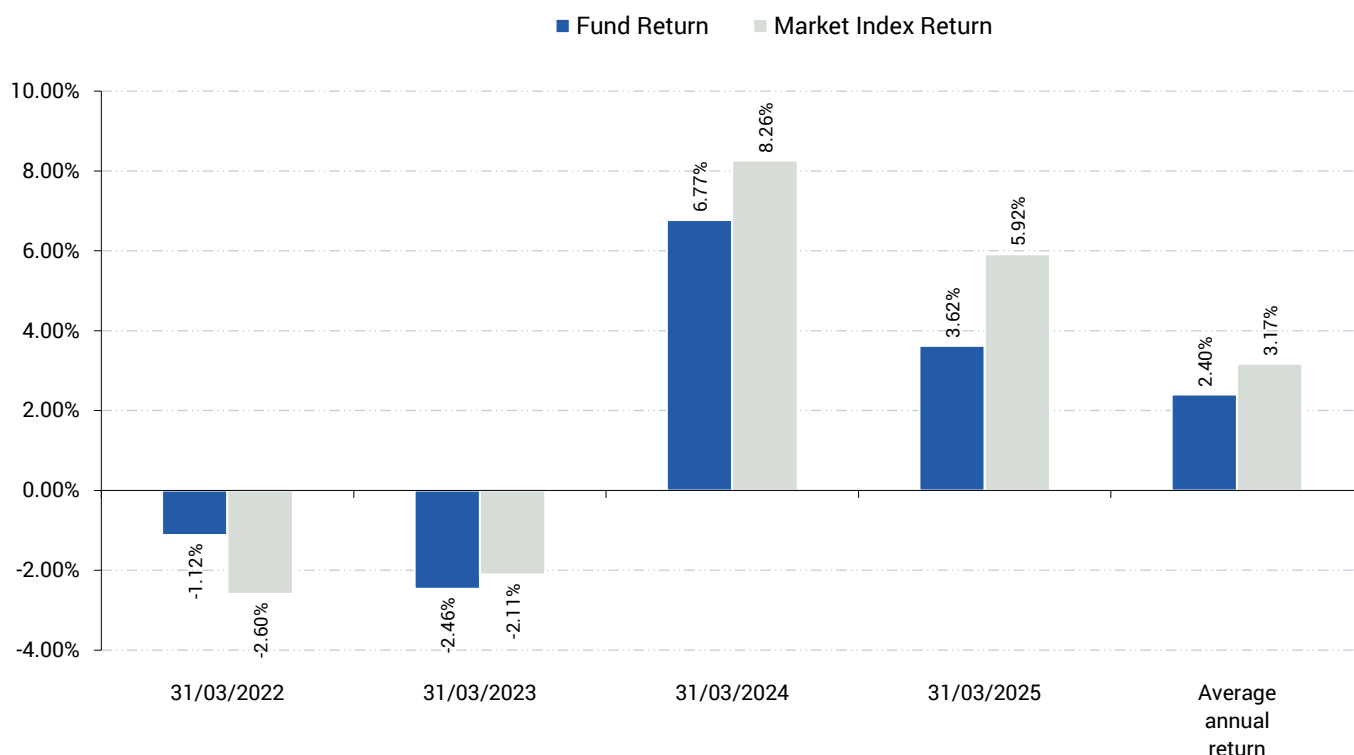

See the Product Disclosure Statement for the JMI Wealth KiwiSaver Scheme for more information about the risks associated with investing in this fund.

## How has the fund performed?

	Past year
<b>Annual return</b> (after deductions for charges and tax)	6.35%
<b>Annual return</b> (after deductions for charges but before tax)	7.32%
<b>Market index annual return</b> (reflects no deduction for charges and tax)	8.13%

The market index return is a composite of benchmark index returns, weighted for the fund's target investment mix (also known as target asset allocation). The specific benchmark indices used for each asset class are defined in the Statement of Investment Policy and Objectives (SIPO). The SIPO and further additional information about the market index is available on the offer register at [disclose-register.companiesoffice.govt.nz](https://disclose-register.companiesoffice.govt.nz).

### Annual return graph

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 30 September 2025.

**Important:** This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

## What fees are investors charged?

Investors in the Conservative Fund are charged fund charges. In the year to 31 March 2025 these were:

	% per annum of fund's net asset value
<b>Total fund charges</b>	1.10%
Which are made up of:	
<b>Total management and administration charge</b>	1.10%
Including:	
Manager's basic fee	0.80%
Other management and administration charges	0.30%
<b>Other charges</b>	<b>Dollar amount per investor</b>
Administration fee	\$36 per annum

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the Product Disclosure Statement for the JMI Wealth KiwiSaver Scheme for more information about those fees.

All fees are disclosed on a before-tax basis. GST will be added to fees and may be included in some expenses, where applicable.

Small differences in fees and charges can have a big impact on your investment over the long term.

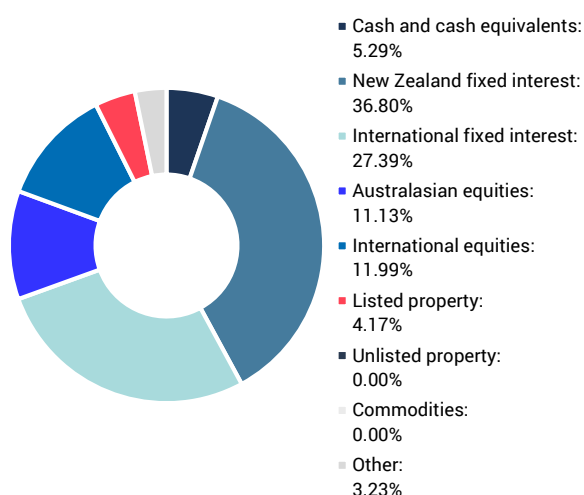

## Example of how this applies to an investor

Debbie had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Debbie received a return after fund charges were deducted but before tax of \$732 (that is 7.32% of Debbie's initial \$10,000). Debbie also paid \$36 in other charges. This gives Debbie a total return after tax of \$599 for the year.

## What does the fund invest in?<sup>2</sup>

### Actual investment mix

This shows the types of assets that the fund invests in.

### Target investment mix

This shows the mix of assets that the fund generally intends to invest in.

## Further information

You can also obtain this information, the Product Disclosure Statement for the JMI Wealth KiwiSaver Scheme, and some additional information, from the offer register at [disclose-register.companiesoffice.govt.nz](https://disclose-register.companiesoffice.govt.nz).

## Notes

- 1 Market index returns (as well as actual returns) have been used to complete the risk indicator, as the fund has not been in existence for 5 years. As a result, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund. The risk indicator for the fund uses 2 months of market index returns.
- 2 The 'other' category refers to an investment in infrastructure. The underlying investments are infrastructure securities listed in developed countries.
